

Figure 2.5. Generalized geological map of the Annapurna-Manaslu-Ganesh region of central Nepal after Colchen et al. (1980). Isograds are dashed and labeled: bt= biotite, grt= garnet; ky= kyanite; sta= staurolite; sil= sillimanite; pyx= pyroxene, carbonate lithologies. STDS? = the presence of the South Tibetan Detachment is debated; MCT= Main Central Thrust; MCT-I?= the presence of Arita's (1983) thrust at the base of the MCT shear zone is debated.
